

Your service partner
for the oil and gas industry

A partner you can trust

Customized and innovative service solutions help you to reduce maintenance time and cost, and improve the efficiency and reliability of your equipment. When pumps, turbines, compressors, generators and electric motors are essential to your operations, you need a service partner you can trust. We offer all our services through one access point to simplify your maintenance management.

Efficiency

- Optimize your operational efficiency with our customized solutions
- Enhance your competitive advantage with our expertise through energy efficiency, improved production output and extended maintenance cycles

Reliability

- Rapid turnaround to minimize disruption and keep your projects on schedule
- Delivery of outstanding service solutions which can be implemented at any time to increase the reliability and availability of your equipment

Your partner

- Find the best solutions together with our dedicated service teams
- Strategically located close to our customers with our service centers, we offer firstclass services 24/7
- Single point interface for rotating equipment

Solutions for upstream

Sulzer is the leading provider for services for rotating equipment in some of the toughest environments in the world. You need a specific solution tailored to your needs, we deliver proven solutions based on our extensive experience. Innovative thinking helps to keep your equipment running offshore (FPSO and platform), onshore, and in tar sands applications.

We provide emergency support and planned maintenance for a range of motors and drives, as well as turbines and pumps. Delivering tailor-made solutions that improve your operations is our top priority.

Solutions for midstream

Sulzer is dedicated to minimizing downtime and maximizing your profitability. Customers turn to us for reliable support and to benefit from fast assessment and rapid repair by our teams. We help you to optimize your energy consumption and match equipment performance with process needs.

To help improve operational reliability, our field service teams provide routine maintenance support on motors, pumps and other rotating equipment.

Solutions for downstream – Refining

Experience in process technology and understanding of the many applications in refining put Sulzer in the leading position as your turnaround partner. We help our customers develop practical solutions, meet the latest industry standards and protect the environment.

We overhaul turbines, compressors, pumps, motors, generators, and other rotating equipment. Inspection work can be scheduled to fit with your turnaround plan ensuring that all work is completed on time.

Solutions for downstream – Petrochemical

The requirements and much of the equipment found in the petrochemical industry are similar to those of refineries. The rotating equipment we service has to withstand special requirements and is, in many cases, custom built. We have extensive experience with custom-built machinery and specialty trains in a wide range of petrochemical applications making products from ethanol, olefins, ammonia and nitric acid, ethylene, styrene and nitroparaffins.

Prior to starting a turnaround project, it is always important to work together with the customer to understand their specific needs. The continuous availability and high operational performance of your rotating equipment is our key target.
