

Sulzer Pumps Chattanooga Service Center

Sulzer Pumps is one of the world's leading manufacturers of centrifugal pumps. Renowned for high quality products, services and innovative solutions, we are dedicated to improving your processes and business performance. Our Customer Support Services team responds to your service needs and is focused on ensuring reliability for all your rotating machinery. Our global network of service centers makes Sulzer Pumps your ideal local service partner.

Resources and Facilities

A new building completed in 2006 incorporates a wide range of machine tools and pump rebuild facilities. These include on-site tear down and inspection, machining, welding, balancing, reassembly and nuclear grade quality certification. Our qualified staff are committed to providing professional and timely responses. In-house engineering resources for common and unique pump service challenges speed response times. Additional support is provided by central engineering and design groups providing specialized mechanical design and hydraulic development such as comprehensive rotor dynamic and finite element analysis.

Core Competencies

- Repair, parts, new pumps, upgrades, and uprates are offered for most nuclear utility pump applications.
- Assumption of design responsibility, reverse engineering, manufacture, and certification of pumps and assemblies for most OEM's.
- Quality Assurance Program certified and audited to meet the requirements of 10CFR50 Appendix B, part 21, and ASME N & NPT Class 1, 2, and 3.
- Hot shop capability for ASME (all code classes) and other radiologically contaminated components.
- Field service including performance diagnostics, troubleshooting, pump work oversight, hydraulic performance, and mechanical condition monitoring.
- Extensive experience in reverse engineering, rapid prototyping manufacturing of parts for pump repairs.
