Main Title:

Headline:

Over 3000 users sign up to select Sulzer pumps online Online Sulzer Select system proves a hit with customers

Sulzer Select, the free online pump selection service provided by Sulzer Pumps recently recorded its 3 000th registered user. Launched in September 2007, the system has proved an instant success with users from all over the globe providing access to select a wide range of Sulzer Pumps products.

Constantly updated with the latest hydraulic and technical data, the system currently allows selection of over 30 pump lines with further introductions planned in the near future. The system allows pumps to be selected using required duty data or by pump type. Once a selection has been made the performance curve and a detailed data sheet is produced giving full operational information for the chosen pump. Another feature of the system is a tool to provide lifecycle cost predictions based on different operating parameters. This is especially useful when comparing the total life cycle costs between different pump types where one may have higher capital cost but provide much lower total lifecycle costs due to superior operating efficiency.

Pump users who have not yet registered can easily do by visiting www.sulzerpumps.com, and choosing the Sulzer Select option from the Pump Selector menu.

Note to Editors:

Sulzer Pumps develops and supplies centrifugal pumps worldwide. Intensive research and development in fluid dynamics, process-oriented products, and special materials as well as reliable service solutions help the division maintain its leading position in its focus market segments. Its customers come from the oil and gas, hydrocarbon processing, power generation, pulp and paper, water distribution and treatment sectors, as well as from specialized areas in the food, metals, and fertilizer businesses.

The company has a network of manufacturing and packaging facilities in 15 countries with sales offices, service centers and representatives in more than 150 countries around the world. A global leader in its selected markets, Sulzer Pumps received orders totaling some 1 263.9 million Euros (2 076.9 CHF) and employed 5 686 people (FTE) worldwide in 2007

Sulzer was founded in 1834 in Winterthur, Switzerland, and is active in over 120 locations worldwide in the machinery and equipment, as well as the surfacing technology business. The divisions are globally leading suppliers in their respective customer segments. Sulzer is a forward-looking company and employs some ten thousand people dedicated to creating innovative technical solutions, which help customers strengthen their competitive position in the global marketplace. Orders received in 2007 reached 2 467.1 million Euros (4 054.0 CHF).
